

THE LITTLE ONE WITH THE BIG SPIRIT!

SUBARU

YOUNG

SUPERIOR INTERIOR!

① The tachometer and speedometer are positioned together in one area for easy reading through the two-spoke steering wheel. The horn is designed especially for higher-speed driving.

② Front seats have provision for attaching safety belts. (The headrests and safety belts are optional.)

③ Controls are grouped conveniently for more driving ease. Leather-covered steering wheel and floor shift knob in matching colors, and bucket-type front seats add zest to the interior styling.

④ 3-speed floor shift lever plus overdrive make the Subaru Young Sedan ideal for getting around quickly. An especially powerful heater provides not only plenty of warmth for comfort but an efficient windshield defroster for added protection. Another design note: the contemporary recessed top.

⑤ For safety and convenience features there are two-speed windshield wipers and windshield washer.
